

1) Gather raw lima beans

2) Soak them overnight

- 3) Gather plastic bag and paper towel. Fold the paper towel hot dog style and wet it with spray bottle.

- 4) Place the wet paper towel in the plastic bag

5) Wet paper towel again

6) Place lima bean on the paper towel and release the air from the bag, then seal it

- 7) After a set period of time, you will hopefully have a lima bean with roots starting to grow!
